

A3 Scanner 掃描器

掃描器和一般掃描器不同的是，考慮到掃描時書本最邊緣的位置會出現黑影。而掃描書的人亦因為書本的弧度，在普通的掃描器未能很燙貼、平面地掃描。它的貼邊設計，就可以方便我們平面地擺放書本，掃描出來的書亦不再出現黑影或模糊不清的情況。

The difference between A3 book scanner and ordinary one is that it considers shadow may appear when scanning a book. Because of the edge and curve of book, it cannot function in an appressed way when using a normal scanner. However, its design allows users to lay the book flat when scanning. It then avoids shadow and unclerness occurring to the scanned file.
